FTX Classic

INTRODUCTION

Welcome to FTX Classic.

FTTC was created primarily for those impacted by the FTX insolvency. This is why our motto at FTC is : For the people, make BNB not war. The development of FTX classic draws inspiration from Bitcoin, Luna Classic, Reflection Tokens, Satoshi Nakamoto and Changpeng Zhao.

FTTC is a safe, reliable, decentralized and deflationary investment vehicle, only and forever on the Binance Smart Chain.

Transparency goes a long way in crypto. You should know some basic facts before making an investment.

We will not list on any centralized exchange other than Binance.

FTX Classic is only and forever a BEP-20 Token.

The owner of the contract cannot modify or manipulate the contract in any way. Fees or supply numbers are permanent and cannot be modified.

After the last milestone burn, the token will be renounced and community owned.

Vision & Mission

FTTC has a mission to provide a vehicle to earn passive BNB dividends, or as we call them Bividends.

Building a leading ecosystem that puts the voice of the investor first, a matrix within itself, originating, developing and containing progress.

Our experienced team focuses on community. Offering a double return. FTX Classic has a mission to provide an enterprise where you can earn consistent BNB bividends, while progressing in the ultimate overarching community goal of becoming a top 100 token on Coinmarketcap rankings.

TOKENOMICS

Milestone Burn System

The Milestone Burn system takes inspiration from the Bitcoin Halving system as well as LUNC and the Lunatics Community. To remain deflationary, FTTC has proposed supply burns that will occur at different milestones.

This will provide a decrease in supply as demand increases.

Milestone Burn Schedule :

- 1% Burn at 1M
- 1.5% Burn at 5M
- 2.5% Burn at 10M
- 5% Burn at 25M
- 10% Burn at 50M
- 15% Burn at 100M
- 25% Burn at 500M

Bividend Protocol

3% of each transaction is made and redistributed to all holders. Hold \$FTTC Tokens and earn BNB.

The Bividend protocol is brilliantly designed to reward holders with passive income through BNB rewards, while the continued evolution of FTTC ensures a lucrative long-term return on investment (ROI).

BUYBACK & CHARITY

Buyback will be random and unsystematic. It's important to note that while this is the case, there is a strategy invoked.

They will primarily funded by our merchandise, 95% of funds will be allocated to buyback and 5% will be allocated to UNICEF.

2% Liquidity Pool

The automatic liquidity system helps to create a stable floor price. The initial liquidity provided has been locked.

The smart contract is successfully audited and will benefit from participating in a Certik Audit with an additional 12 months of SkyNet smart contract security monitoring.

\$FTTC WILL ONLY
AND FOREVER
BE ON THE BNB CHAIN

BNB CHAIN

BNB Chain was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the Binance Team called BEP-20.

Advantages of the BNB chain are:

- It's a proprietary blockchain, which will provide security and safety to all users and developers.
- Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience.
- It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.
- Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.
